

March 4, 2011

To whom it may concern:

I have known Gene Johnston of Johnston Products of Dallas for more than ten years and have worked on several projects with his company. Gene personally gets involved with his projects and is very hands-on with each giving us a good feeling that not only will things be done timely, they will be done with the highest level of quality possible.

We have had several last minute rush projects that needed not only the work completed but needed the innovation that Johnston Products produced that is above and beyond that standard practice would not require.

Most recently, Manhattan Construction was involved with Johnston Products in the building of the Cowboys Stadium and a project for the City of Grand Prairie. The quality of their work was exceptional and it was a pleasure to work with such a dedicated and dependable team which Johnston Products had put together.

MCC would not hesitate to use Gene and his company on any complex high finish project because of the long history of peak performance.

Please let me know if any additional information would be helpful.

Sincerely,

MANHATTAN CONSTRUCTION COMPANY

John W. Dixon

Executive Vice President of Special Projects
