**Re: Safety Performance**

I am pleased with your contribution to the required safety performance and incentives your company has shown along with the contribution in time and strong effort in helping StructureTone SW maintain an outstanding Safety Program on all our projects.

Your overall safety performance has helped keep both our companies qualified within the OSHA Partnership program through our local TEXO/ABC chapters statewide in Texas. By integrating safety as a daily job requirement, our image as safety conscious companies will be the result we all can pass on and talk about for years to come.

I look forward to continue working with Johnston Products toward this objective, and continued success in our safety programs. Thanks again for your time, energy, and most of all your strong commitment to a safe and healthy work place.
